TITAN

tuš kade / piatti doccia / shower trays

Tuš kade TITAN izrađuju se u četiri standardne dimenzije, a namijenjene su ugradnji u razinu poda. Posebno su elegantne ukoliko se kombiniraju s paravanom Zenith. ASTONE, materijal od kojeg su izrađene TITAN tuš kade, po svojoj prirodi je protuklizan i vrlo ugodan na dodir te je stoga idealan dodatak svakoj kupaonici.

I piatti doccia della linea TITAN sono disponibili in quattro misure e pensati per un'installazione a filo pavimento. Sono molto eleganti specialmente in combinazione con il modello Zenith. I piatti doccia sono antiscivolo e piacevoli al tatto.

TITAN shower trays are available in four standard dimensions and are intended to be mounted in floor level. They are especially elegant if combined with shower screen Zenith. ASTONE, material from which TITAN shower trays are made of, is slip resistant and pleasant to the touch, making it an ideal addition to any bathroom.

TITAN

umivaonici / lavabi / washbasins

Ponekad je samo jedan element dovoljan za potpuno drukčiji estetski dojam cijele kupaonice. Umivaonici TITAN objedinjuju maksimalnu funkcionalnost i eleganciju zahvaljujući blago zaobljenim linijama koje čine umivaoničke zdjele bešavno spojene s umivaoničkim pultom.

A volte un singolo elemento può cambiare l'aspetto di un'intera stanza. I mobili della linea TITAN combinano la massima funzionalità con l'eleganza delle linee.

Sometimes a single element can make the whole difference in the feeling that a space provides. TITAN washbasins combine maximal functionality and elegance which is reflected in their gentle and smooth appearance thanks to the seamless joint between washbasin and countertop.

ASTONE je visokokvalitetni kompozitni *solid surface* materijal razvijen u hrvatskom poduzeću Aquaestil plus. Tehnički gledajući, ASTONE je prirodni mineral aluminij-tri-hidrat u prahu povezan akrilno-modificiranom poliesterskom smolom i obojan prirodnim pigmentom, a to mu daje izvanredna tehnička svojstva i visoku razinu primjenjivosti i izdržljivosti.

ASTONE je potpuno homogen po cijeloj svojoj strukturi, ne razdvaja se u slojevima, otporan je na termalne šokove i udarce. Stabiliziran je na UV zrake, a toplinu podnosi bolje od većine drugih materijala tako da ga kratka izloženost temperaturi kao npr. pepeo cigarete ili vruće ulje neće oštetiti. Neosjetljiv je na većinu kemikalija te potpuno neporozan, što ga između ostalog, čini idealnim i za bolnice, laboratorije i liječničke ordinacije.

Proizvodnja ASTONE materijala ne zagađuje okoliš i ne ispušta stakleničke plinove, a sam materijal može se direktno reciklirati.

ASTONE è un materiale di alta qualità sviluppato da Aquaestil plus leader in Croazia nella produzione di prodotti per il bagno. ASTONE è un materiale composto da polveri di alluminio tri-idrato mescolate con resine poliestere acriliche e colorato con pigmenti naturali.

ASTONE è un materiale completamente omogeneo resistente agli urti e shock termici. Stabile all'esposizione a raggi UV e resistente a brevi esposizioni alle alte temperature quali ad esempio cenere, olio bollente. ASTONE è un materiale impermeabile alla maggior parte dei prodotti chimici ed inoltre è completamente non poroso, il che lo rende particolarmente adatto negli ospedali, laboratori e cliniche.

ASTONE è un materiale ecologico che può essere riciclato.

ASTONE is a high quality composite *solid surface* material developed by Aquaestil plus, leading Croatian bathroom equipment manufacturer. By its chemical composition, ASTONE is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin colored with natural pigments.

ASTONE is a completely homogeneous material throughout its structure, it does not separate into layers and is resistant to thermal shock and impacts. It is also stable against UV radiation and endures heat better than most materials; ensuring that a brief exposure to high temperatures, such as cigarette ash and hot oil, will not damage it. ASTONE is impervious to most chemicals and completely non-porous, which among other things, makes it ideal for places like hospitals, laboratories and health clinics.

ASTONE production is eco-friendly and has zero greenhouse gas emission. Material can be recycled directly.
